2021 WATER CONSERVATION MEASURES

Dear Customer,

Lukins Brothers Water Company, Inc. (LBWC) would like to thank you for your continued efforts conserving water. In order to help manage limited resources during current drought conditions, LBWC would like to remind homeowners of statewide urban water conservation measures, including mandatory restrictions and helpful tips to reduce water consumption. Your continued cooperation and support is needed to ensure reliable supplies of water for your comfort and necessary use.

Watering Schedule:

Even Addresses- Monday and Thursday

Odd Addresses- Tuesday and Friday

LBWC recommends that you adjust your sprinklers to prevent any runoff. Please do not water continually for more than an hour. Outdoor irrigation represents on average, 50-80 percent of all water use for residential customers.

Further information may be obtained from Lukins Brothers Water Company's local business office at (530) 541-2606 or by visiting our website at www.lukinswater.com.

Again, Lukins Brothers Water Company wants to thank you in advance for helping us manage and conserve our precious resources.
